

February 27, 1976

the bad. So the reason for this is so that a price list is established for the handling of these beans at the time they are put into the elevator. I would move the advancement of this amendment.

PRESIDENT: Senator Mills, first, Senator Stull. Senator Mills.

SENATOR MILLS: Mr. President, I was assured that this was a non-controversial bill. However, Senator Nichol has brought in an area that really is not involved with the bill. He is talking about...we are talking about warehouse receipts and this language of the statutes, not of guaranteeing insurance storage and all of that. There is a place on the warehouse receipt as mandated by the Public Service Commission to show the amount of storage due, the amount of time, the amount of charges for that and this should be brought into a separate area. I understand the people in the edible bean business have a problem there but this is not particularly the section of the statute to address that and I would urge that you reject that amendment.

PRESIDENT: Senator Stull.

SENATOR STULL: Mr. President and members of the Legislature, I would like to ask Senator Nichol a question.

SENATOR NICHOL: Yes, sir.

SENATOR STULL: Senator Nichol, if beans go in of a fairly high quality, they can process these beans much faster than if they happen to have some beans that perhaps were frost damaged or something like that. Then how do you propose to take care of the difference in the time that it would take to run these beans across there machine?

SENATOR NICHOL: Senator, are you talking about the electronic device?

SENATOR STULL: Yes.

SENATOR NICHOL: As I understand it, and I am not an authority on this, so I wouldn't swear this is absolutely the truth but the only time I observed it is that these small little pincer like things picks up each bean one at a time and runs it through and it doesn't matter whether it is good or bad. The time should be the same. This is as I understand it, Senator Stull.

SENATOR STULL: Okay, thank you.

PRESIDENT: Senator Mills.

SENATOR MILLS: Mr. President, I am trying to get through this so that others can get to their bills but I want to bring out a couple of things here that I do not believe that this should be adopted. It talks about before the first load of grain is brought in each year. Where is that grain, when is it, everywhere. I just don't believe
